

IN THE CLAIMS:

Please cancel Claims 1-5, 13 and 14. Amend Claims 6, 8 and 15-19. The changes in these Claims are shown with ~~strikethrough~~ for deleted matter and underlines for added matter. A complete listing of the claims with proper claim identifiers is set forth below.

1.-5. (Cancelled)

6. (Currently Amended) An acrylic elastomer composition comprising an acrylic elastomer (A), and a polyorganosiloxane-containing graft polymer (B), wherein the acrylic elastomer (A) is an acrylic block ~~blocker~~-copolymer comprising:

- (a) an acrylic polymer block; and
- (b) a methacrylic polymer block.

7. (Previously Amended) The acrylic elastomer composition according to claim 6, wherein the acrylic block copolymer contains a unit (c1) having an acid anhydride group and/or a unit (c2) having a carboxyl group represented by formula (1):

Formula (1):

(wherein R¹ each represent a hydrogen atom or a methyl group and may be the same or different, p represents an integer of 0 or 1, and q represents an integer of 0 to 3).

8. (Currently Amended) The acrylic elastomer composition according to claim ~~6~~ 7, wherein the acrylic block copolymer contains 0.1 to 50 percent by weight of the unit (c2) containing a carboxyl group on the basis of the entirety of the acrylic block copolymer.

9. (Previously Amended) The acrylic elastomer composition according to claim 6, wherein the acrylic block copolymer contains 40 to 90 percent by weight of the acrylic polymer block (a) and 60 to 10 percent by weight of the methacrylic polymer block (b) on the basis of the entirety of the acrylic block copolymer.

10. (Previously Amended) The acrylic elastomer composition according to claim 6, wherein the acrylic polymer block (a) contains 50 to 100 percent by weight of a unit containing at least one selected from the group consisting of n-butyl acrylate, ethyl acrylate, and 2-methoxyethyl acrylate, and 0 to 50 percent by weight of a unit containing ~~an~~ another acrylate and/or another vinyl monomer copolymerizable therewith.

11. (Original) The acrylic elastomer composition according to claim 10, wherein the acrylic polymer block (a) contains 5 percent by weight to 90 percent by weight of 2-methoxyethyl acrylate, 5 percent by weight to 90 percent by weight of n-butyl acrylate, 5 percent by weight to 90 percent by weight of ethyl acrylate.

12. (Previously Amended) The acrylic elastomer composition according to claim 6, wherein the acrylic block copolymer is produced by atom transfer radical polymerization.

13.-14. (Cancelled)

15. (Currently Amended) An acrylic elastomer composition comprising an acrylic elastomer (A), and a polyorganosiloxane-containing graft polymer (B) wherein the graft component of the polyorganosiloxane-containing graft polymer (B) contains 5 to 99.5 percent by weight of an alkyl methacrylate, and 95 to 0.5 percent by weight of an alkyl acrylate on the basis of the entirety of the graft component, and wherein the graft component of the polyorganosiloxane-containing graft polymer (B) contains 0.5 to 50

percent by weight of n-butyl methacrylate as an essential alkyl methacrylate component on the basis of the entirety of the graft component.

16. (Currently Amended) An acrylic elastomer composition comprising an acrylic elastomer (A), and a polyorganosiloxane-containing graft polymer (B), wherein the polyorganosiloxane-containing graft polymer (B) comprises 5 to 40 percent by weight of a graft component, and 95 to 60 percent by weight of a polyorganosiloxane, and wherein the graft component of the polyorganosiloxane-containing graft polymer (B) contains 0.5 to 10 percent by weight of methacrylic acid or acrylic acid on the basis of the entirety of the graft component.

17. (Currently Amended) An acrylic elastomer composition comprising an acrylic elastomer (A), and a polyorganosiloxane-containing graft polymer (B), wherein the acrylic elastomer (A) comprises a mixture of acrylic block copolymers including an acrylic block copolymer (E-1) comprising an acrylic polymer block (a1) and a methacrylic polymer block (b), and an acrylic block copolymer (E-2) comprising an acrylic polymer block (a2) different from the acrylic polymer block (a1) and the methacrylic polymer block (b), the acrylic block copolymer (E-1) having a low-temperature brittle temperature which is at least 5°C higher than that of the acrylic block copolymer (E-2).

18. (Currently Amended) The acrylic elastomer composition according to ~~claim 1~~ any one of claims 6, 15, 16 or 17, further comprising 0.11 to 10 parts by weight of a lubricant, 0.1 to 100 parts by weight of an inorganic filler, and 0.1 to 100 parts by weight of a thermoplastic resin on the basis of 100 parts by weight of the acrylic elastomer (A).

19. (Currently Amended) A molded product comprising the acrylic elastomer composition according to ~~claim 1~~ any one of claims 6, 15, 16 or 17.

20. (Original) An automobile, electric or electronic part comprising the molded product of the acrylic elastomer composition according to claim 19.
